EXCLUSIVE ATTENDANCE

These workshops are being organised for Health Care Professionals. All registered pharmacists are invited to become members of the Malta College of Pharmacy Practice and attend.

NOTICE BOARD

- The next issue of the **Chronic*ill** will be out by July 2002. Pharmacists interested in submitting papers may do so by no later than 15th April 2002. Instructions for authors may be found in the last issue of the **Chronic*ill**.

Companies wishing to place adverts in the **Chronic*ill** may contact Ms Angela Borg Barthet on email: mcpharm@yahoo.com or mobile: 7947 0720.

- The MCPP autumn professional development programme will be focusing on pediatrics; we therefore invite you to offer your suggestions for topics to be addressed during this session. Those wishing to sponsor events please contact Ms Angela Borg Barthet on email: mcpharm@yahoo.com or mobile: 7947 0720.
- We are currently in the process of setting up a database of pharmacists' email addresses to enhance communication. We would be very much obliged if you would forward your email to us on mcpharm@yahoo.com

MALTA COLLEGE OF PHARMACY PRACTICE

PROFESSIONAL DEVELOPMENT PROGRAMME WINTER 2002

focus on

CARDIOVASCULAR DISEASE

PART I

in collaboration with
Department of Pharmacy
Department of Clinical Pharmacology & Therapeutics
University of Malta

PROFESSIONAL DEVELOPMENT PROGRAMME WINTER 2002

Dear colleague,

Despite the increase in knowledge regarding the pathophysiology, diagnostic methods and treatment, cardiovascular disease remains a leading cause of morbidity and mortality in the western world, with Malta being no exception. The aim is to prevent such disease or at least delay progression.

Pharmacists are in a key position to participate in the management of cardiovascular disease by advising on behavioral or lifestyle modifications, monitoring the use of drugs and working in collaboration with physicians to provide optimal pharmaceutical care to patients suffering from cardiovascular disease.

Our programme this winter addresses a few of the major topics that need to be discussed. We aim to hold another session to discuss this vast and extremely important subject. The caliber of these workshops may be assessed by glancing at our distinguished list of speakers, who are established leaders in their field of expertise.

We would like to thank the speakers who have agreed to address our members despite their busy schedule. Our thanks also goes to the sponsoring pharmaceutical companies for their support. We look forward to seeing you at our events.

Maria Cordina
B.Pharm. (Hons) Ph.D. (QUB)
President
Malta College of Pharmacy Practice

CARDIOVASCULAR RISK FACTOR MANAGEMENT

Scope

Cardiovascular diseases, of which coronary heart disease is the most common, are the major causes of death in Established Market Economies. Lifestyle modification and risk factor reduction have been shown to retard the development of coronary disease. The pharmacist plays a key role as an active re-inforcer of the advice received by the patient.

Objectives

- To understand the various prevention strategies and the concept of risk
- To identify the priorities of coronary heart disease prevention in clinical practice
- To learn to advise lifestyle modifications
- To highlight specific points regarding the therapeutic management

Delivered by

Dr Oscar Aquilina
MD, MRCP(UK)

Consultant Cardiologist
St Luke's Hospital

Sponsored by

V.J. Salamone (Trading) Ltd
Pharmaceutical Division

Date

Thursday, 21 February 2002

Time

19:30 for 20:00

Venue

Lecture Centre, Car Park 2
University of Malta

Book by

Thursday, 14 February 2002

This workshop provides 4 credits towards the MCPP continuing education requirement.

IS DEEP VEIN THROMBOSIS SERIOUS?

Scope

Deep vein thrombosis is one of the most common and potentially fatal medical conditions in clinical practice, especially in the elderly. The various precipitating factors will be highlighted, prevention emphasized and modalities of treatment discussed.

Objectives

- to familiarize the practicing pharmacist with the common clinical presentations
- to discuss management with special reference to the mode of action of the drugs used, their side effects and the relevance of drug interactions
- to underline the role of the clinical pharmacist in such settings

Delivered by

Professor Frederick F. Fenech
MOM, MD, FRCP, FACP, KM

Sponsored by

LEO Pharmaceuticals Ltd

Date

Thursday, 28 February 2002

Time

19:30 for 20:00

Venue

Lecture Centre, Car Park 2
University of Malta

Book by

Thursday, 21 February 2002

This workshop provides 4 credits towards the MCPP continuing education requirement.

THE MANAGEMENT OF CHRONIC STABLE ANGINA

Scope

The management of patients with chronic stable angina incorporates lifestyle modifications, drug therapy and coronary revascularisation. The presentation will focus on the use of drug therapy and how the selection of medication should be based on clinical trial evidence together with the consideration of other factors, such as coexisting disease, concurrent treatment, adverse effects, patient compliance and costs.

Objectives

- to provide an update of the current treatment guidelines for the management of chronic stable angina
- to highlight the major factors which influence the choice of medication

Delivered by

Ms Marise Gauci
B.Pharm (Hons.), MSc (QUB)

Department of Pharmacy,
University of Malta

Sponsored by

Date

Thursday, 14 March 2002

Time

19:30 for 20:00

Venue

Lecture Centre, Car Park 2
University of Malta

Book by

Thursday, 7 March 2002

This workshop provides 4 credits towards the MCPP continuing education requirement.

MANAGEMENT OF MYOCARDIAL INFARCTION

Scope

Recent changes in the understanding of the pathophysiology of Myocardial Infarction has all but revolutionised the management of those unfortunate enough to suffer an attack. The change in education curriculae to introduce CPR and health education has changed the natural history of this condition.

Objectives

- to describe the evolution of the actual Infarct and how this understanding changed its management.
- to outline the management of Myocardial Infarction both in hospital and - just as important - at home.

Delivered by

Professor Albert Fenech
MD(Malta), MD(Aberdeen), FRCP(Glasgow), FRCP(Aberdeen)

Consultant Cardiologist
St. Luke's Hospital

Associate Professor of Medicine
University of Malta Medical School

Sponsored by

SPITERI MAEMPEL LTD

Date

Wednesday, 20 March 2002

Time

19:30 for 20:00

Venue

Lecture Centre, Car Park 2
University of Malta

Book by

Wednesday, 13 March 2002

This workshop provides 4 credits towards the MCPP continuing education requirement.

PHARMACEUTICAL CARE

...is the responsible provision of drug therapy for the purpose of achieving definite outcomes that improve a patient's quality of life...

...is provided for the direct benefit of the patient and the pharmacist is responsible directly to the patient for the quality of that care."

C.D. Hepler
